

A
Project Report
On
“Let’s Talk About Culture” Website
A Web Development Project
Designed & Developed
by
Miss. Sanjana Jaysingh Yadav
Guided by: Ms Drashti Sharimal
Submitted in Fulfillment of Academic Project
[Bachelors Of Science-Computer Science]
[University Of Mumbai]

DECLARATION

I 'MissSanjana Jaysingh Yadav' hereby declare that I myself have completed the project under the guidance of 'Ms Drashti Sharimal'.

I on my own have created the website and have done all the programming required. It may require some modifications in the future as per the user's requirements.

From a practical implementation point of view, flexibility in the changes have been incorporated in the package and I am sure that I can satisfy the same in future.

- Sanjana Jaysingh Yadav

Certificate of Project Completion

This is to confirm & certify that **Ms Sanjana Jaysingh Yadav**, BSc (Computer Science) student from “*Thakur College of Science & Commerce [Autonomous], Kandivali (E)*”, with **Roll No. 419** in Academic Year 2021-2022 has successfully completed his/her project titled **“Let’s Talk About Culture based on Front End Web Development”**.

This project has been completed within the given time period & the project report is submitted in partial fulfilment of B.Sc. (Computer Science) course as per rules of Thakur College of Science and Commerce during the academic year 2021-2022.

1. Introduction

It is a Front End Web Development project. It is an Informative and Entertainment website. On this website there will be articles about Interesting things about culture, history, exploring various cultural references in movies and music videos different instances of Cultural appropriation. This topic was chosen because in this day and age of Social media is such a big part of our lifestyle. Cultural appropriation is a topic that should be discussed more. So the main aim is to create a space for people to learn about each others culture and history.

When people travel to a different country they like to know about the culture of the country. So this website can act as a guide to them to understand the deeper meaning and value of different traditions all in one place. This website is also to inform people about different cultures and why certain behaviour or actions can be wrong or disheartening to certain people as they hold emotional and cultural value to them. It can also be a fun learning process for people who are interested in learning about a different culture or if you like debunking various cultural references in a music video or a movie.

It is an Entertainment website that explores the cultural side of things and provides with its references and creates a space for people to speak and share about their culture. The website will be more focused on the front end and design visual part.

There will be the use of technologies like HTML, CSS, Jquery, Javascript, Bootstrap and AOS of different animation.

This will give out an aesthetic look to the website and make it more user friendly.

2. Requirement Specifications

Minimum System Requirements:

- ✓ Pentium IV or higher processor
- ✓ 1 GB RAM or higher
- ✓ 40GB Hard Disk or higher
- ✓ Internet
- ✓ Web Browser

Recommended System Requirements:

- ✓ Pentium IV or higher processor
- ✓ 2 GB RAM
- ✓ 40GB Hard Disk
- ✓ Internet
- ✓ Web Browser

Software Used For Development

- Adobe Dreamweaver

3. System Design Details

Here I will give an explanation of all the Technologies used in this project

List of technologies:-

--HTML

The HyperText Markup Language or HTML is the standard markup language for documents designed to be displayed in a web browser.

The HTML elements are used as a building block for the website.

--CSS

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

CSS is designed to enable the separation of presentation and content, including layout, colours, and fonts. This separation is used to improve content accessibility, provide more flexibility and control in the specification of presentation characteristics, enable multiple web pages to share formatting by specifying the relevant CSS in a separate .css file which reduces complexity and repetition in the structural content as well as enabling the .css file to be cached to improve the page load speed between the pages that share the file and its formatting.

--Javascript

JavaScript animations are done by programming gradual changes in an element's style.

The changes are called by a timer. When the timer interval is small, the animation looks continuous.

--Bootstrap

Bootstrap is the most popular HTML, CSS, and JavaScript framework for developing responsive, mobile-first websites.

Bootstrap is completely free to download and use!

--Jquery

jQuery is a JavaScript framework that runs very fast with a very small size of JavaScript library code. It can easily implement a lot of JavaScript animation effects by operating DOM objects, processing events, and handling Ajax interactions. jQuery can simplify your JavaScript source code to improve your development speed and JavaScript code execution performance.

--AOS

Animations are used to attract people's attention and add interactivity to your web application rather than just a static page. With animations, users tend to engage more with the features of your application. One of the best animations to add to your webpage is the on-scroll animation. An on-scroll animation is a form of Scrollytelling, which means telling a story or displaying content while scrolling.

On-scroll animation can be complicated to implement on a website without the use of certain scroll animation libraries. These libraries provide a simple interface for creating different interactions on the scroll and improving the user experience. With the Animate on scroll(AOS) library, you can add animations smoothly, and it's easy to configure.

Detailed Explanation of the Technologies:-

-HTML

<Section tag>

Section tag defines the section of documents such as chapters, headers, footers or any other sections.

The section tag divides the content into sections and subsections.

The section tag is used when requirements of two headers or footers or any other section of documents are needed.

Section tag grouped the generic block of related contents.

The main advantage of the section tag is, it is a semantic element, which describes its meaning to both browser and developer.

As you can see it is being used on the index.html page to create different sections like Articles, Our team, Events and Contact Us and its Id is used to link it with the navigation bar.

```
index.html* x
Source Code ◀ bootstrap.min.css font-awesome.min.css aos.css style.css jq
16 ▼ <body data-spy="scroll" data-target="#navbarNav" c
17
18
19      <!-- nav bar starts -->
20 ►   <div class="navbar navbar-...
52
53      <!-- navbar ends -->
54      <!-- section 1 -->
55 ►   <div id="carouselExampleCa...
90
91      <!-- section 1 ends -->
92      <!-- section-2 starts -->

150
151
152 ►   <section class="home-about...
170
171      <!-- section 3 starts -->
172
173 ▼   <section class="our-team-area section-padding-...
174 ▼     <div class="container">
175 ►       <div class="row"> <div cla...
184 ▼       <div class="row">
185 ▼         <div class="col-md-6 col-xl-3">
186 ▼           <div class="team-content-area">
```

--CSS

```
a {  
    color: var(--link-color);  
    font-weight: normal;  
    text-decoration: none;  
    transition: all 0.3s ease;  
}  
  
a:hover,  
a:active,  
a:focus {  
    color: var(--primary-color);  
    outline: none;  
    text-decoration: none;  
}  
  
ul,  
ol {  
    padding: 0;  
    margin: 0;  
}
```

The : hover selector is used to select elements when you mouse over them.

The :active selector to style the active link.

The :focus selector is used to select the element that has focus.

--JQuery in Javascript file

```
3      // SMOOTHSCROLL NAVBAR
4  $(function () {
5    $(".navbar a, .hero-text a").on("click", function (event) {
6      var $anchor = $(this);
7      $("html, body")
8        .stop()
9        .animate(
10          {
11            scrollTop: $($anchor.attr("href")).offset().top - 49,
12          },
13          1000
14        );
15      event.preventDefault();
16    });
17  });
18 })(jQuery);
```

Here in the script.js, it is there to help us to scroll through all the content in the navigation bar smoothly.

--Bootstrap

```
54      <!-- section 1 -->
55  ▼   <div id="carouselExampleCaptions" class="carousel slide carousel-fade" data-ride="carousel">
56  ▼     <ol class="carousel-indicators">
57     <li data-target="#carouselExampleCaptions" data-slide-to="0" class="active"></li>
58     <li data-target="#carouselExampleCaptions" data-slide-to="1"></li>
59     <li data-target="#carouselExampleCaptions" data-slide-to="2"></li>
60   </ol>
61  ▼     <div class="carousel-inner">
```

carousel slide carousel-fade

The carousel is a slideshow for cycling through a series of content, built with CSS 3D transforms and a bit of JavaScript. It works with a series of images, text, or custom markup. It also includes support for previous/next controls and indicators.

This is how the sliding images are available in section 1 of the index.html page.

--AOS

```
96 ▼           <div class="row">
97 ▼             <div class="col-md-3 d-flex align-items-stretch" data-aos="fade-up" data-aos-delay="300">
98 ▼               <div class="offer-deal text-center">
99                 <div class="img" style="background-image: url(gallery-1.jpg)"></div>
  <div class="text">
```

As shown in the above picture of page index.html line no.97

The aos animations used here are:

Fade animation:

 Fade Up

 data-aos-delay

The amount of time in which you want your animation to be delayed can be set using this attribute. AOS provides a default duration of 50ms. In our case, it is 300.

To use this attribute, your values must between 0 to 3000, with step 50ms.

4. System Implementation

Coding:

Index.html

```
<!DOCTYPE html>
<html lang="en">

<h1>Stray Kids "Thunderous" Music Video Brakdown </h1>
<h3>Let's see what the sorikkun have to say. </h3>
<div id="bannerImage"></div>
```

<p>“Thunderous” is “sorikkun,” a term that refers generally to a singer, usually of traditional Korean music forms. Bang Chan explained, “The message of the song is that Stray Kids, as sorikkun, will face off against the jansorikkun [naggers] and confidently let loose our sound.” </p>

<p>Through ‘Thunderous,’ they wanted to share their own unique kind of music. I think that ‘Thunderous’ is an extension of the ‘mala [spicy]’ genre [that they did with ‘God’s Menu’ and ‘Back Door’]. This is my personal thought, and I hope that people will feel it directly through watching our performances. </p>

<p>About the concept of “Thunderous,” You could say our concept this time is ‘dokkaebi’ [goblins] and ‘black and red. They are expressing Stray Kids’ unique sound and color in a way that they haven’t shown before. The key point of our choreography is the hand gesture that expresses how they confidently spit out everything we want to say. Overall, the choreography shows strength and energy as well as some unique dance lines and some fun moments.” </p>

<p>Seungmin said, “The meaning is something like, ‘Life isn’t easy because of the naggers who tell us to do this and that, but we’re Stray Kids and we’re not backing down.’ If you listen to the album’s b-side tracks, you’ll be able to hear our larger musical spectrum and diverse expressions.” </p>

Culture And History

As Marcus Garvey has said "A people without the Knowledge of their past history, origin and culture is like a tree without roots" because every Country and Place has A History, A Story And A Culture, So let's explore it.

Appropriation OR Appreciation

Appropriation occurs when a style leads to racist generalizations or stereotypes where it originates, but is deemed as high fashion, cool, or funny when the privileged take it for themselves. Appropriation occurs when the appropriator is not aware of the deep significance of the culture that they are partaking in.

Movies and Music Video Cultural Breakdown

One of the great gifts of film is its capacity to connect audiences to other people's point of view, whether they from the same surroundings or from another part of the world altogether.

Olympic Cultural Events Breakdown

The Olympic Games have become a multi sport event, which entertains not only athletes from different countries, but a world wide audience numbering millions. They therefore exceed any other sports or cultural event when it comes to matters of public interest.

Events section

The screenshot shows a web browser window for 'Let's Talk About Culture' at the URL 127.0.0.1:2531/preview/app/index.html. The page features a dark header with the site name and navigation links for HOME, ARTICLES, OUR TEAM, EVENTS (which is highlighted in red), CONTACT US, and LOGIN. Below the header is a section titled 'UPCOMING EVENTS' with the sub-instruction 'Come and Join us in some of these fun activities.' There are three event cards displayed:

- Halloween Celebration**
by Abhay Gupta
on 31 Oct, 2021
in Borivali East
- Seminar on Cultural Appropriation**
by Sanjana Yadav
on 1 Nov, 2021
in Borivali East
- Diwali Celebration**

The browser's taskbar at the bottom shows various open tabs and system icons.

Contacts section

The screenshot shows the same web browser window for 'Let's Talk About Culture'. The main content area has two sections: 'FEEL FREE TO ASK ANYTHING' on the left and 'WHERE YOU CAN FIND US' on the right.

FEEL FREE TO ASK ANYTHING

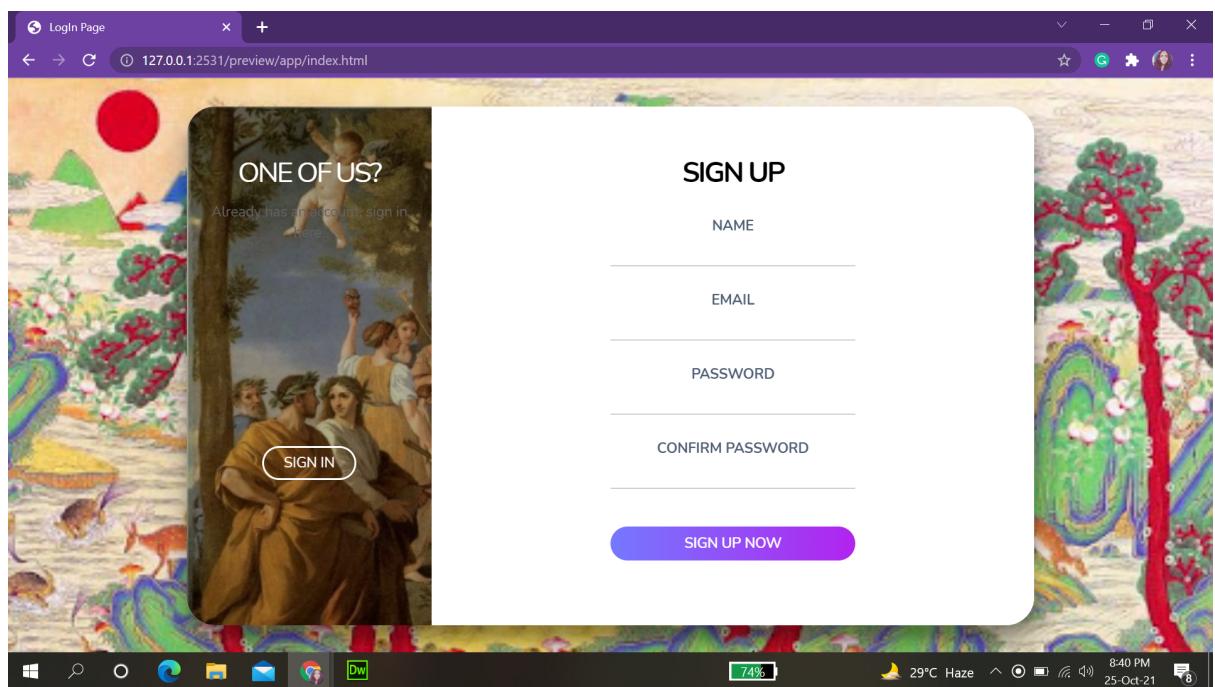

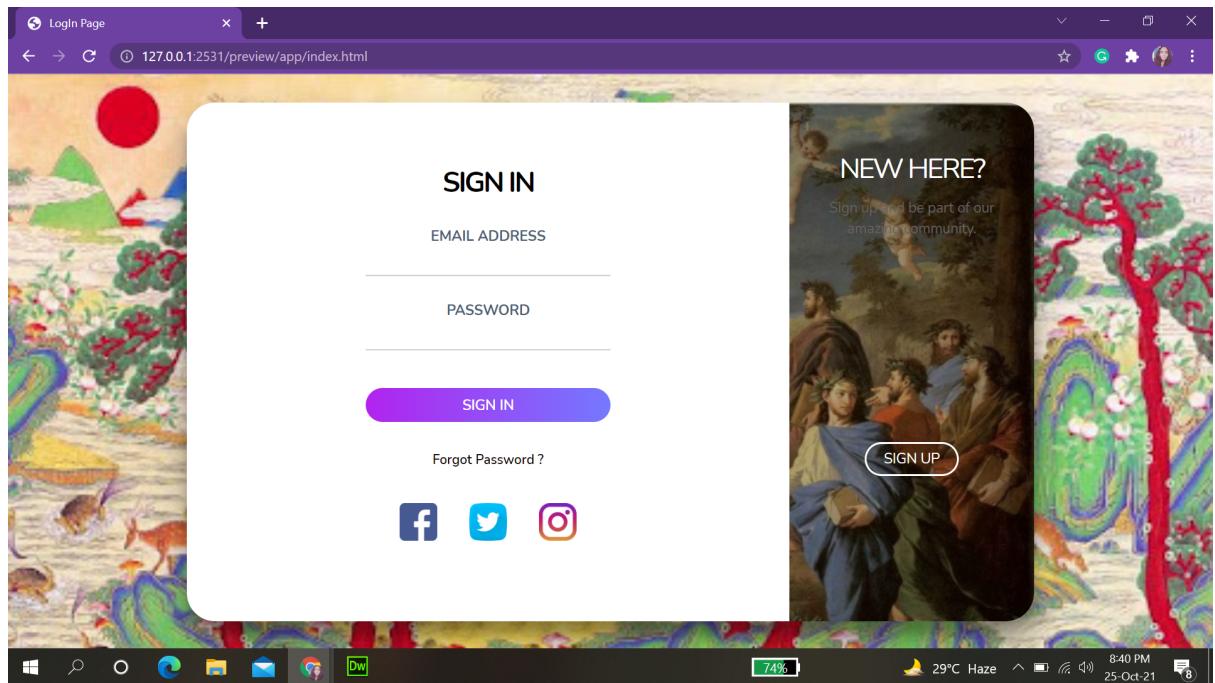

Three input fields for Name, Emails, and Message, followed by a large black 'Send Message' button.

WHERE YOU CAN FIND US

A map of Mumbai showing the location of Borivali East, Maharashtra, India. Key landmarks labeled include Phoenix Marketcity, KJ Somaiya College of Arts And Commerce, and various hospitals and offices.

The browser's taskbar at the bottom shows various open tabs and system icons.

6. Conclusion and Future Scope

Conclusion:-

A front-end website Let's Talk about Culture is created.

Future Scope:-

-This is just the Front-End part of the website. A Back-end part can be added to make it more user Friendly

-Using PHP we can create two different logins an admin login and a user login. We can give the admin user rights to publish an article with a text editor that is only accessible to the admin.

Then we will not have to add articles through the Html page.

- In the navigation bar, we can add a countries section so the user can easily explore through the articles based on the topic of their liking
- And another crazy idea is that we can add a map in which when a user selects a certain location all the articles related to the location will show-up
